PRIYANSHU SARKAR

Aspiring AI / Software Development Intern

Bhubaneswar, Odisha, India | priyanshu.91007@gmail.com | +91 72092 54563 | GitHub | LinkedIn

SUMMARY

2nd-year engineering student at KIIT Bhubaneswar with hands-on Python development experience and a growing focus on applied AI. Placed 12th out of 285 teams at a GDG on Campus KIIT hackathon, building an agentic AI pipeline from specification to a working, tested system. Google-certified in AI fundamentals and prompt engineering. Looking for an AI or software development internship to contribute to real projects and keep building.

EDUCATION

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar
Bachelor of Technology (B.Tech) — 2nd Year, undergraduate

SKILLS

- **Programming Languages:** Python (primary), C, C++
- **AI & Prompt Engineering:** AI tool usage, prompt design, responsible AI practices
- **Web Development:** Frontend development fundamentals (HTML, CSS, JavaScript)
- **Tools:** Git & GitHub, VS Code

PROJECTS

InvoicePilot AI — Agentic Invoice Processing Pipeline | *Hackathon project, Team GoldOmen*

- Ranked 12th out of 285 teams at the "Deploy or [Redacted]" hackathon hosted by GDG on Campus KIIT, as part of a 4-member team.
- Designed an AI agent pipeline that takes an invoice document as input and produces structured data extraction, a validation report, a policy-compliance check, a risk score, and a final recommendation — with a full audit trail of every step the agent took.
- Worked through the full agent-driven lifecycle: turning a written specification into a running, tested, and deployed system.

Multi-Function Scientific Calculator | *Personal project (Python)*

- Built a desktop calculator application in Python with a graphical interface, supporting arithmetic, scientific functions, matrix operations, statistics, unit conversions, and equation solving. View on GitHub
- Added persistent calculation history and customizable UI themes.
- Structured the codebase into clean, independent modules (engine, GUI, conversions, equations, matrix operations, statistics) for readability and easy extension.

CERTIFICATIONS & ACHIEVEMENTS

- **Google AI Essentials Specialization** — Coursera, issued May 2026. 5-course program: Introduction to AI, Maximize Productivity with AI Tools, Discover the Art of Prompting, Use AI Responsibly, Stay Ahead of the AI Curve.
- Ranked 12th of 285 teams — "Deploy or [Redacted]" hackathon, GDG on Campus KIIT (2026).
